August 2025

## **OPIOIDS PRESCRIBED ON DISCHARGE**

Please be reminded that modified-release (MR) opioids should not be prescribed for post-operative pain due to their increased risk and unsuitability for acute pain, as per the Drug Safety Alert, March 2025: "Prolonged-release opioids: Removal of indication for relief of post-operative pain - GOV.UK." Acute post-operative pain is typically short-term and self-limiting, making immediate-release opioids the preferred treatment option. If you encounter discharge paperwork that lists MR opioids for post-operative pain or lacks a clear plan for discontinuing or tapering opioids (including a recommended stop date), please contact the hospital department for clarification.

Both NUH and SFH are actively reviewing their processes related to post-operative pain and CD discharge documentation. This is a significant undertaking involving many systems and clinicians, so there may still be occasions when discharge paperwork is not as comprehensive as desired.

### IMPORTANT UPDATES ON DISCONTINUED BRANDED PRODUCTS

Please be aware that several branded products have recently been discontinued and changed to generic:

Discontinued Brand	Generic
Caverject® 10 microgram and	Alprostadil 10 microgram and
20 microgram powder and solvent for	20 microgram powder and solvent for
injection*	injection
Dalacin® cream, lotion and capsules	Clindamycin
Premarin® tablets	Conjugated oestrogens
Premique® Low Dose 0.3mg/1.5mg modified-release tablets	Conjugated oestrogens 300microgram / Medroxyprogesterone 1.5mg modified-release tablets
Provera® tablets	Medroxyprogesterone tablets
Otomize® ear spray	Dexamethasone/ Neomycin sulfate/ Acetic acid 0.1%w/w / 0.5%w/w / 2%w/w ear spray

<sup>\*</sup> Caverject® Dual Chamber remains available and should continue to be prescribed by brand

These products should now be prescribed generically as the branded versions are no longer available. Please note:

- In SystmOne, some of these generic products may appear in orange text which indicates that branded prescribing is recommended. However, the generics can still be selected and prescribed.
- If the generic product doesn't appear in a search, try ticking the "non-prescribable / unlicensed" box to locate.

# TRIAMCINOLONE ACETONIDE 10MG/ML (ADCORTYL® AMPOULES) AND 40MG/ML (KENALOG® VIALS) SUSPENSION FOR INJECTION DISCONTINUED

The Department of Health and Social Care have issued a Medicine Supply Notification regarding triamcinolone acetonide 10mg/ml (Adcortyl® ampoules) and 40mg/ml (Kenalog® vials). Both are being discontinued with stock expected to be exhausted by early June 2025. Alternatives are available, please use a licenced product first line where available. See the notification for further details.

## NHSBSA ELECTRONIC REPEAT DISPENSING RESOURCES

The NHSBSA has various resources available to support GP practices with electronic repeat dispensing. See here <u>eRD resources for GP practices | NHSBSA</u>.
